

# Slasher

Single rotor grass topper

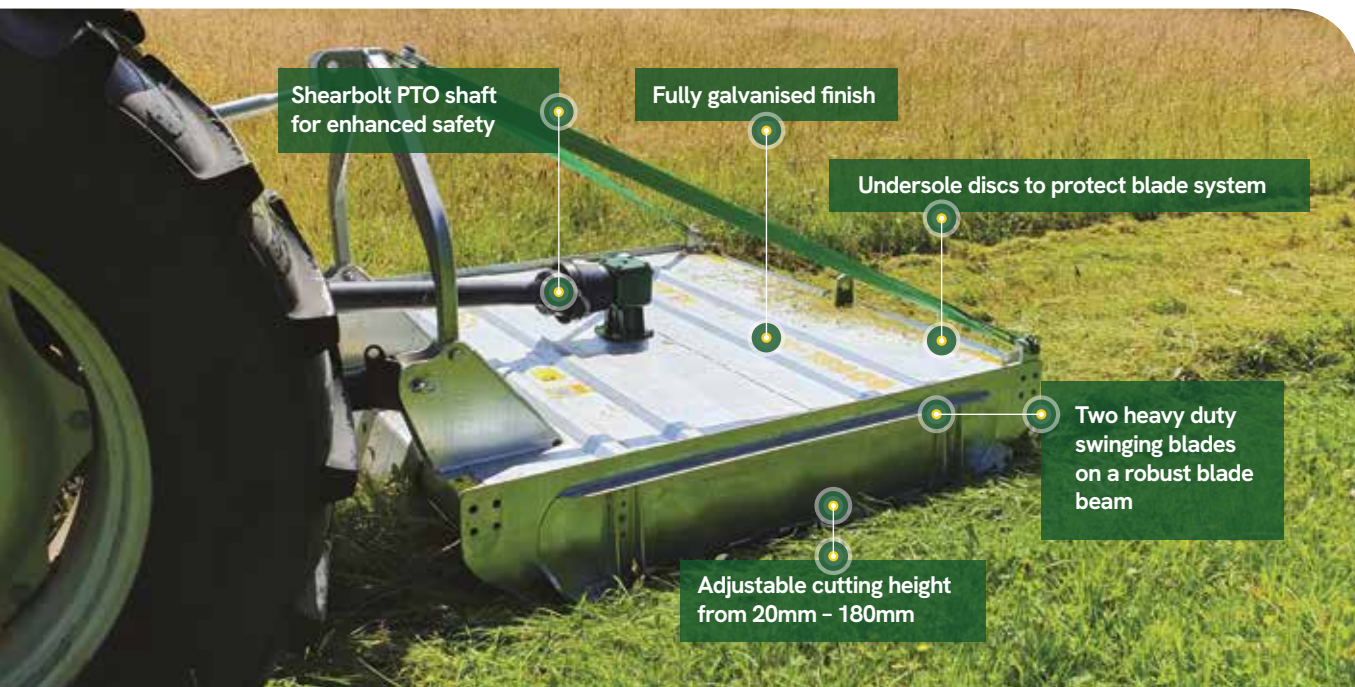

▶ Watch Video

The **MAJOR** Grass Slasher is single rotor machine designed for general pasture maintenance and overgrown sites.

It is ideal for topping grasses, weeds, rushes, heather, light scrub and hardy vegetation. These machines are perfect for small holdings and suitable for most compact and medium-sized tractors.

The slasher is fitted with two heavy duty swinging blades fixed on a robust blade carrier. A heavy duty gearbox transfers power directly to the blade system, which is capable of cutting material up to 30mm in diameter. The MAJOR Slasher is a low maintenance machine compared with belt-driven mowers.

A shearbolt PTO protects the driveline in the event of hitting an obstacle whilst mowing. The cutting height is set by adjusting the two side skids. The skids have wide runners to prevent damage to the ground.

MODEL	605SL
Overall width	1.99m / 6' 6"
Working width	1.73m / 5' 8"
Power (HP)	30-60
PTO rpm	540
Cutting height	20-180mm
Rotor	1
Blades	2
Weight	330kg
Blade speed	72 m/s
